Safety & Quality

Allweld access platforms radically improve workplace safety.

Features include stair access with high visibility nosings, aluminium walkway mesh platforms & stairs for maximum grip in the wet, and self-closing gates to prevent the operator from accidentally falling down the stairs when they are engaged in their work.

Platforms are Australian made and fully welded from marine grade aluminium.

Allweld can customize to suit your needs enabling access to heavy machinery, trucks and semi-trailers whether it be for washing trucks, unloading or restraining loads.

Order Pickers

- Popular as truck wash platforms
- Available in any height
- Available with bigger wheels to suit rough terrain
- Optional safety gates fully enclose the operator
- Load rated to 150kg
- Steps welded inside and out to prevent diagonal flexing
- Fully welded aluminium
